

FT-500

Counterfeit Detector

★The Most Economical Product in The World

★With M10 Spectral Analyzer, can be
35 & 60 Times Magnification

★5 inch TFT LCD color high
resolution display

M10

FT-500

- *Built-in 5 inch TFT LCD, resolution 480*272
- *Equipped with quality image sensor and high sensitive camera
- *Reliable image processing techniques and special design of viewing
- *Key light source: High brightness Infrared light-emitting diode, combined with appropriate filter
- *Image detecting field range: 135*77mm
- *Function capabilities can be expanded with optional interface
- *Optional interface: USB standard interface is used for power supply interface

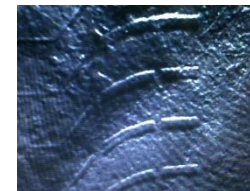

Main Device

UV, Top white light, IR, white transmitted light, IR transmitted light

Spectral Analyzer

- *Can be 35 or 60 times magnification
- *Function:
Spectral Features Analyzer: White Light, side white light, UV, IR, side IR, IR blink

Model	FT-500 / M10(Spectral Analyzer)
Display	5 inch TFT LCD digital panel
Power Supply	100 or 240VAC 50/60HZ 12V, 3A, 15W (max)
Dimension(L*W*H) IR-210	275×150×155mm
Net Weight	0.89g

Side IR light

Side IR light

UV light

IR light
