

# IR-211

## Counterfeit Detector

★The Most Economical Product in The World

★With M10 Spectral Analyzer, can be  
35 & 60 Times Magnification

★3.5inch TFT LCD color high  
resolution display

M10

### IR-211

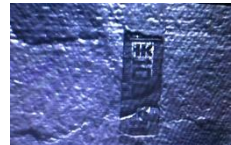

- \*Built-in 3.5 inch TFT LCD high resolution display
- \*Equipped with quality image sensor and high sensitive camera
- \*Reliable image processing techniques and special design of viewing
- \*Key light source: High brightness Infrared light-emitting diode, combined with appropriate filter
- \*Image detecting field range: Length(150mm)\*Width (120mm)
- \*Function capabilities can be expanded with optional interface
- \*Optional camera large visual field image detector interface: USB standard interface is used for power supply interface
- \*Optional interface: USB standard interface is used for power supply interface
- \*Optional AV video output interface(RCA video interface)

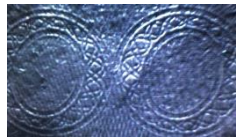

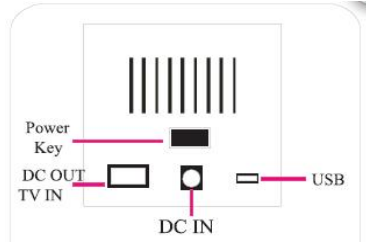

UV light

### Spectral Analyzer

- Can be 35 or 60 times magnification
- Function:
- Main device: IR, Side IR, Infrared cross-light (850/940nm);  
Spectral Features Analyzer: White Light, Side White Light, White Cross-Light; UV Light(365nm), IR.
